

PRE-VISIT SPECIES LIST

The following is a partial list of some of the animals you will see on your tour of Jenkinson's Aquarium. There are a number of ways in which to utilize this species list. Some examples are:

- Copy and give it out to your students so they can become familiar with the animals before the tour.
 - Have each student choose an animal from the list and have them do a small report on it.
 - Ask students to bring the list with them to the aquarium and check off the animals they see on their tour.
 - Use the list to classify the animals. Put them into groups (fish, birds, reptiles, mammals, invertebrates, and vertebrates).
